Amana Tool Hand/Table Edge Carbide-Tipped 2-Flute w/Ball Bearing Guide

Thank you for shopping with us! These special router bits are used for cutting tabletop edges or used with handrail side profile bits. Originally designed for easing and profiling the edges of tabletops, these bits also are widely used on handrails for the same purpose. With these bits, simultaneously eliminate hard edges, reduce the visual thickness of a tabletop, and add an elegant detail. Standard 1/2" bearing #47706 (included) Optional 3/8" bearing #47702 (order separately)
