Amana Tool Convex Edging Carbide-Tipped 2-Flute w/ or w/o Ball Bearing Guide

Thank you for shopping with us! Cuts a shallow arc—the fingernail shape—rather than a full 180° roundover. Like the bullnose radius bit, it has short flats above and below the cutter arc, which produce fillets on stock thicker than 7/8". Must be used with an edge guide on handheld routers, or the fence on a router table.
