**Amana Tool Dynabit™ Laminate Trim Carbide-Tipped 2-Flute w/Ball Bearing Guide**

Thank you for shopping with us! The Amana Tool Dynabit™ Line features a modest downshear for an excellent finish. The helix bits have a spiral-like twist to the cutting edges, making them especially good on difficult materials such as melamine. An adhesive-trapping gap between cutting edges and pilot bearing is featured on tools #47111 & #47113. **NOTE:** Downshear bits are not intended for router table use. AMAX Extended Life Features: 200% longer life-time even when working with abrasive materials Superior geometric design Advanced

grinding technology that improves the carbide's resistance to wear Super clean cuts Sample:

Item #	Manufacturer	Bearing(s)	Diameter	Cut Height, Length, or Width	Flute Geometry	Flute	Overall Length	Shank	Note	Price
--------	--------------	------------	----------	------------------------------	----------------	-------	----------------	-------	------	-------
