Amana Tool Flush Trim Plunge Template Carbide-Tipped Router Bits w/Upper Ball Bearing Guide

Thank you for shopping with us!

This bit is essentially a plunge-cutting straight with a shank-mounted ball bearing pilot. Versatile; useful for template/pattern routing of parts, joints, internal cuts, and can be used in handheld and table-mounted routers. The template is attached to the workpiece, and the pilot bearing rides along its edge as the cutting edges rout the workpiece, forming an exact duplicate of the template. With a handheld router, the pattern is on top of the work; with a table-mounted router, the pattern is underneath the work.

- Extra strong; new generation of high wear carbide
- Superior geometric design provides super clean cuts
- 2 & 3 Flute with upper ball bearing guide
- Miniature and standard available, downshear available, single or double bearing available

AMAX Extended Life Features: 200% longer lifetime even when working with abrasive materials. Superior geometric design. Advanced grinding technology that improves the carbide's resistance to wear. Super clean cuts.

Downshear angle cuts faster, cleaner, and lasts longer than straight angle because of the chip removal speed. We recommend using the downshear angle in most instances, especially where large diameters are used.

Item #	Manufacturer	Diameter	Cut Height, Length, or Width	Bearing(s)	Flute Geometry	Flute	Overall Length	Shank	Replacement Parts	Price
