Amana Tool Raised Panel 'V' Joint Carbide-Tipped Router Bits

Thank you for shopping with us! The principle benefit of this glue-joint bit is that the glue seam is far less evident on the bevels of raised panels. Equally important, setup is fast. Cut one half of each joint with the bit at any height. Simply raise or lower the bit 3/32" before cutting the mates. As with all glue-joint bits, the cutter profile expands the edge-to-edge glue surface; more important, it produces the precise surface alignment that's essential for fast glueups. For best results, use in a

router table.

Item #	Manufacturer	Diameter	Cut Height, Length, or Width	Overall Length	Shank	Angle	Price
45790	Amana Tool	1 3/8 in	1 37/64 in	3 1/16 in	1/2 in	80 deg	\$80.21
