Amana Tool Solid Carbide Spektra™ Extreme Tool Life Coated Compression Spirals for Baltic Birch Plywood

Thank you for shopping with us! Special unique carbide for longer lifetime in abrasive material. Designed for CNC applications requiring high feed rates and a clean finish. Designed for baltic birch plywood material. Long cherished for cabinet-making and more. Flawless compression cuts. Our Spektra™ bits feature a nACo® nanocomposite coating with an extreme nanohardness and heat resistance. With a brilliant distinctively-tinted coloring nACo provides additional improvements in four critical aspects of router tooling. -nACo coating is a micro-thin ceramic coating which enables the tool's cutting edge to retain crucial sharpness and lubricity. This provides longevity and produces cutting results of the highest quality. - Coating prevents high heat and oxidation which is detrimental to cutting tool performance. -Multi-colored hues, while attractive, will dissipate upon use and yet coating will remain fully effective. -nACo offers approximately 4,500 Vickers for impressive solid hardness on cutting areas of the tool, for an increase up to 2.5 times compared to uncoated bits. Note: Blue based color dissipates immediately upon use. nACo® nanocomposite coating will not wear off. **Excellent for cutting:** Baltic Birch Plywood

Item #	Manufacturer	Diameter	B1	Cut Height, Length, or Width	Flute	Overall Length	Shank	Type	Price
46700-K	Amana Tool	1/4 in	7mm	7/8 in	2	2 1/2 in	1/4 in	nACo Ceramic Coating	\$61.50
