Amana Tool Spektra™ Solid Carbide Ball Nose Spiral CNC Bits for Wood, MDF, Plastics

Thank you for shopping with us! Used for carving decorative doors and sign manufacturing. Upcut design leaves an excellent finish and expels chips quickly. Excellent for Cutting: -Soft/Hard Wood -MDF -Soft/Hard Plastic -Sign Foam. Our Spektra™ bits feature a nACo® nanocomposite coating with an extreme nanohardness and heat resistance. With a brilliant distinctively-tinted coloring, nACo® provides additional improvements in four critical aspects of router tooling: -nACo® coating is a micro-thin ceramic coating that enables the tool's cutting edge to retain crucial sharpness and lubricity. This provides longevity and produces cutting results of the highest quality. -Coating prevents high heat and oxidation, which is detrimental to cutting tool performance. -Multi-colored hues, while attractive, will dissipate upon use and yet coating will remain fully effective. -nACo® offers approximately 4,500 Vickers for impressive solid hardness on cutting areas of the tool, for an increase up to 2.5 times compared to uncoated bits. Note: Blue based color dissipates immediately upon use. nACo® nanocomposite coating will not wear off.

Item #	Manufacturer	Diameter	Cut Height, Length, or Width	Flute	Overall Length	Radius	Shank	Price
46369-K	Amana Tool	1/8 in	1/2 in	2	2 in	1/16 in	1/4 in	\$51.38
