Amana Tool Spektra™ Solid Carbide Engraving & V-Groove CNC Bits for Extra-Fine Carving & Lettering Detail

Thank you for shopping with us! For extra-fine carving and lettering details. Our Spektra™ bits feature a nACo® nanocomposite coating with an extreme nanohardness and heat resistance. With a brilliant distinctively-tinted coloring, nACo® provides additional improvements in four critical aspects of router tooling: -nACo® coating is a micro-thin ceramic coating that enables the tool's cutting edge to retain crucial sharpness and lubricity. This provides longevity and produces cutting results of the highest quality. -Coating prevents high heat and oxidation, which is detrimental to cutting tool performance. -Multi-colored hues, while attractive, will dissipate upon use and yet coating will remain fully effective. -nACo® offers approximately 4,500 Vickers for impressive solid hardness on cutting areas of the tool, for an increase up to 2.5 times compared to uncoated bits. Note: Blue based color dissipates immediately upon use. nACo® nanocomposite coating will not wear off.

Item #	Manufacturer	Diameter	Cut Height, Length, or Width	Flute	Overall Length	Shank	Tip/Point	Angle	Price
45611-K	Amana Tool	N/A	0.93 in	1	2 1/4 in	1/4 in	0.005 in	15 deg	\$42.00
