Amana Professional Quality Cove Router Bits

Thank you for shopping with us!

The covetto form—produced by the cove bit—is one of the classic building blocks for many molding profiles. Use it alone or in combination with beads and fillets. Use the cove as well to detail the edges of casework, doors and drawers, posts and columns. The cove also makes up one-half of the rule joint used on drop-leaf tables. The other half is the corner-round. Use in handheld or table-mounted routers. Large diameter tools must be run at reduced speed. For best results with a large radius cutter, make a preliminary cut with a smaller radius bit or chamfer the work-piece to reduce the amount of stock to be removed in the finish pass. This will produce a smoother finish and prolong tool life. 1/4" & 1/2" Shank 2 Flute w/ball bearing guide Professional Quality Carbide-Tipped

Item #	Manufacturer	Diameter	Cut Height, Length, or Width	Bearing(s)	Flute	Overall Length	Radius	Shank	Price
