**Amana Professional Quality Crown Molding Router Bit**

Thank you for shopping with us!

Produce a mid-sized crown molding profile for architectural and furniture applications. This bit cuts the profile and bevel, as necessary, which is the show face of the work-piece. Bevel the top and bottom edges on the table saw to complete the molding. Use a 2+ horsepower router, mounted in a table, with a fence to guide the work. To prolong cutter life, reduce strain on the router. For the best cut finish, make several passes to achieve full cut depth. With one of our chamfer bits, bevel back edges, cutting off 45° excess.

Use in a table-mounted router. Not for use in a handheld router.

1/2" Shank

2 Flute

Professional Quality Carbide-Tipped
