Whiteside Machine Vee Panel Tongue & Groove Router Bits

Thank you for shopping with us!

Use the two-piece Whiteside Machine Vee Panel Tongue and Groove set with a ball bearing guide for connecting a joint in your project. This joint is different from a standard tongue and groove since it allows for a small vee groove above the joint. Recommended for a material thickness of 5/8"-1". Any material over 1" thick will require a second cut on the tongue profile to waste away excess stock. Ball Bearing Guide Order 3374 for two piece set. Order 3374A or 3374B for individual cutters.
