Amana Tool Double-Face Melamine, Korton & Veneers

Thank you for shopping with us! Can't find what you need? Give us a call and we'll be happy to assist you. Alterations to the geometry and plate thickness provide improved results in certain melamine boards. The bevel angle of the ATB grind is far more acute (35°), and the plate is thinner than our standard melamine blades. *Note: P.H. denotes pin-hole configuration, if applicable. Example: 2/10/60 = 2 @ 10mm dia on 60mm circle.*

Warning: Before use, read saw blade safety guidelines in [Amana's catalog](#).

2° Negative Hook • 35° 'High-ATB' Grind
