### Amana Tool Thin Kerf Trim Saw Blades

Thank you for shopping with us! Thin kerf blades require less power because they have thinner plates and narrower tips. For that reason, this trim blade is ideal for jobsite table saws and the various miter saws. Available in either alternate top bevel grind for cutting hardwood, softwood, and plywood, or available in triple-chip grind for chipboard and laminate-covered material. Also suitable for cutting thin Plexiglas®, masonite, and plastics. Use of stabilizers is recommended when cutting stock over 3/4" thick. **Warning:** Before use, read saw blade safety guidelines in [Amana's catalog](#).

Item #	Manufacturer	Diameter	Bore	Grind	Kerf	Plate	Teeth	Hook Angle	Price
TB86400	Amana Tool	8 in (200 mm)	5/8 in	ATB	0.09 in	.062 in	64	10 deg	\$
