Everlast General Purpose Cut-Off Saws - Alternate Top Bevel

Designed for all around general purpose cutting in solid woods, plywood, masonite, chip core, and laminated formica (single-sided). Alternate Top Bevel - ATB - Each tooth has top bevel typically between 10 and 20 degrees. Two teeth are required to provide a full kerf cut. Provides low cutting pressures, which reduce material tearing during the cutting process and provides a fine cutting finish. Best performance cross cutting.
