### Everlast Double Face Laminate Saws - 30° ATB

Thank you for shopping with us! The perfect saw for cutting double-sided materials such as Melamine, Kortron, and Veneer. Can be used on radial or table saws. High Alternate Top Bevel - Hi ATB - Identical configuration to ATB, but each tooth has top bevel of 30 degrees or more. The greater angle can cause faster wearing/dulling. Combine with Micro-5 carbide to increase time between sharpenings. Ideal for cutting of laminated materials. Provides a fine cutting finish with proper sharpening. An Alternate Face Bevel (AFB) can be added to this design upon request.
