Freud® Saw Blades to Cut Non-Ferrous Metals: Series LU5A

Thank you for shopping with us!

Carbide-Tipped blade ideal for cutting aluminum and non-ferrous metals. Incorporates Tri-Metal Brazing, which consists of copper sandwiched between two layers of silver alloy to create a stronger, more impact-resistant bond between the carbide and the blade body. Silver I.C.E. Coating prevents build-up on the blade surface and keeps the blade running cooler and cleaner. Machines: Single or double miter saws with mechanical clamping of the piece. Features: Flat triple-chip tooth with positive cutting angle. Material: Aluminum and non-ferrous metals. Ideal For: To cut solid drawn products with a thickness included between 2mm and 10mm.

Item #	Diameter	Arbor	Hook Angle	Kerf	Pinholes	Plate	Teeth	Note	Price
