Freud Thin Kerf Rip Blades: Series LU87R

Thank you for shopping with us!

Application: Heavy-Duty Ripping Blades for Underpowered Saws This blade gives new life to underpowered table saws and radial arm saws because the thin kerf does not require much horsepower. The Perma-SHIELD® coating helps this blade pull 1/3 less on the saw, which translates to over 33% more cutting power. The ideal working range is from 3/4" to 2 3/4" thick. Premium TiCo™ HI-Density Carbide Ripping Blend for Maximum Performance. Thin Kerf allows for faster feed rate and reduced waste. Positive Hook Angles for fast cutting and easy feeding in ripping applications. Perma-Shield™ Non-Stick Coating reduces blade drag, protects the blade from corrosion and pitch build-up. Ideal For: Heavy-Duty Ripping Blades For Underpowered Saws. Depth of cut (3/4" to 2-3/4"). **TIP:** Maintain a proper feed rate. Feeding too slow causes burning of the material. Feeding too fast can be dangerous and produces a poor dull cut.
