Popular Tools Protective Plastic Wrap & Wax Stick

Thank you for shopping with us!

Protective Plastic Wrap The days of dripping saw blades is over! Great in both cold and hot climates. Our tubing is safe and easy to use. Popular Tools protective wrap can be used over and over. Approximately 2,200 feet long and good for about 750 ten in saw blades. **Wax Stick** Popular Tools wax stick is an excellent grease stick that provides lubrication as well as reduces friction and tool wear. We recommend using lubrication when cutting non-ferrous materials (refer to our [Popular Tools Non-Ferrous Saw Blades](#)) and Popular Tools wax stick is designed for just that purpose. An affordable way to reduce chattering, burring, and galling when cutting non-ferrous materials. Biodegradable, non-irritating, and non-toxic. Sold individually or as a case of 24.

| Item # | Manufacturer | Part Descp. | Features | Unit Price | Pack Quantity | Price |
|---------------|---------------|-------------------------|---|------------|---------------|-----------------|
