### Tenryu Steel-Pro® Select Series

Thank you for shopping with us! Low RPM Dry Cut Saws. Circular Saws. The Steel-Pro® Select is Tenryu's 2nd generation of mild steel cutting carbide-tipped saw blades—Quieter! These blades are designed to cut mild steel as Steel-Pro® blades do, but cut quieter than Steel-Pro® and last longer as well. Each Blade Features: -Exclusive, two-ply plate design for self-dampening and low noise operation -Individually hammer-tensioned steel plates for true run -Touch C-6 carbide for impact resistance and long cutting life -Unique tip design and geometry for smoother and easier cuts -Inserted teeth with chip limiting steel support for added durability and safety Steel-Pro® Select blades, when used for the proper application, will save time and can outlast abrasive discs up to 30 to 1. Note: Please note all safety instructions before use and adhere to instructions for maximum RPM speeds.
