Whiteside Plus Combination Blades

Thank you for shopping with us! The standard multi-purpose blade for a wide range of materials, including softwood, hardwood, plywood, and particle board. The large gullet at the raker tooth, along with the 15° hook angle, provides easy feeding for ripping style cuts, while the close grouping of the other four ATB teeth produces a lighter chip load for crosscutting and finish work. These blades offer a great combination of versatility and efficiency.

Item #	Bore	Diameter	Grind	Hook Angle	Kerf	Teeth	Manufacturer	Price
90800101	5/8 in	8 in	COMB	15 Deg	0.126 in	40	Whiteside Machine	\$78.30
90800401	5/8 in	10 in	COMB	15 Deg	0.134 in	50	Whiteside Machine	\$78.66
90800505	1 in	12 in	COMB	15 Deg	0.150 in	60	Whiteside Machine	\$115.52
