Amana Tool In-Bevel™ Insert Adjustable Chamfer

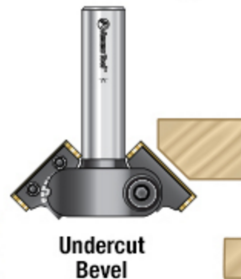

Thank you for shopping with us! In-Bevel™ insert router bit complete with two cutting flutes. Suitable for producing chamfer, rabbet, bevel, and spoilboard cuts at various angles in softwood, hardwood, and man-made boards. The dial clicks/stops every 7.5° by using a notched scale. Good for use in CNC machine, handheld router, and router table machines. Insert knives are coated for longer cutting life with two cutting edges that allow users to rotate the knife when one side becomes dull. The dial clicks/stops every 7.5 degrees. General purpose knife: #RCK-460 Optional Special carbide grade for long lasting MDF work: #RCK-462 Bit tolerance is (+) (-) 0.5°
