Item #210-23, Amana Professional Quality Round Over Groove Router Bits \$60.97

Thank you for shopping with us!
This bit creates a flat-bottom groove between two quarter-round shapes. Short vertical walls extending below the radius lend extra depth to the appearance. Depending on the cut depth adjustment, the radii can be flush with the work surface or it can be recessed. The profile can be formed on an edge using an edge guide or on the router table using a fence.

**Note: No. 210-23 use in a table-mounted router.
Not for use in a handheld router!**

1/2" Shank
2 Flute
Professional Quality Carbide-Tipped
