Item #2660, Whiteside Machine 1/2"SH, 3/4"CD, 5/8"CL Laminate Flush Trimmer with Euro Square Bearing \$35.59

Thank you for shopping with us!

Here's a Square Deal!

A quality Whiteside Trim Bit with the exclusive Euro Square Bearing. *How does it work?* The square bearing stops spinning as soon as it touches the workpiece. Then the side of the square simply slides along the workpiece edge. Compare this to a regular bearing that rolls along the edge—building up more glue and residue with every revolution. Plus, the square is made from non-stick Teflon® so it wipes clean easily and it won't mark your workpiece. If you cut laminates, you need to try this bit.

These bits are designed with a slight taper on the cutting diameter. This allows up or down adjustment to achieve an exact blend—even after sharpening.

Replace the standard 1/2" B3 bearing found on most of our Edge Form bits with the **B3SQ** square bearing if residue build-up on the bearing or marring of the workpiece is a problem.

Recommended for solid surface applications. **B3SQ** is a 1/2" square. **B8SQ** is a 3/4" square. Both are standard 3/16" inside diameter.

SPECIFICATIONS

Manufacturer	Whiteside Machine
Diameter	3/4 in cutting diameter
Cut Height, Length, or Width	5/8 in cutting length
Bearing(s)	B8SQ Square Bearing
Material	Natural woods, composite woods, laminates, hard plastics
Overall Length	2 1/4 in
RPM	14,000-16,000
Shank	1/2 in
