Item #3608, Whiteside Machine 3/16" Radius, 1/2" Shank, 3/8" Sm Dia, 1-1/8" Lg Dia Plunge Ogee Router Bit \$40.46

Thank you for shopping with us! Small Grooving Bits are commonly used for decorative designs in cabinet doors or for detail veining in furniture. Round Nose Bits and V-Groove Bits (60°, 90°) are often used in the same manner. The Larger Grooving Bits are great for a raised panel effect in doors and for adding a bold accent to furniture or large workpieces. These bits also make nice edge profiles with the aid of a router table and fence.
