Item #41620, Techniks PowerCOAT 35mm ER20 Dust Seal Nut - Torque 59 ft/lbs **\$70.00**

Thank you for shopping with us!

Use with our dust seal that snaps into the nut to seal and protect your collets and cutting tools. Match the ER collet size and shank size to the dust seal specifications. -40% more holding power than bearing nuts. -Balanced to 25,000 RPM. -Better rigidity and T.I.R. (runout). PowerCOAT Nuts outperform bearing nuts! -Rubber bearing seals on bearing nuts eventually fail, and then dust contaminates bearings to make them freeze up. -Uncoated threads limit holding power. -Bearing nuts cannot be balanced because they have moving parts so cutting tools wear prematurely. CNC Routers run better with PowerCOAT! PowerCOAT nuts greatly reduce friction between the nut, collet shoulder, and tool holder threads to increase down-force on the collet, collapsing tighter around the tool shank. This improves holding power and runout (T.I.R.). Better T.I.R. means cutting is faster and smoother, and tool life is also improved.

SPECIFICATIONS

Manufacturer	Techniks
Diameter	35mm
Recommended Torque	59 ft/lbs
Style	ER20 HS Dust Seal Nut
Thread Size/Length	M25x1.5
Wrench	0.4614
Height	24mm
