Item #45582, Amana Tool Carbide-Tipped Downshear Design Mortising 1/2" Dia x 3/4" x 1/4" Shank with Upper BB \$31.80

Thank you for shopping with us!

There is no faster method for producing multiple mortises than with a template. And the accuracy achieved with a template is unparalleled. These mortise bits are specially designed for use with templates, both linear and curved.

If you've ever used a bushing with template work then you'll appreciate these bearing-guided bits; there's no need to calculate offset—ever. Instead, the mortise is sized exactly to the template. And, unlike a bushing on the router sub-base, the guide bearing is always concentric to the cutting circle of the bit. This ensures precise cuts every time.

Note: A proper mortising bit should have a large gullet (as shown in the image below) between the two flutes. This allows greater chip clearance and removal.

SPECIFICATIONS

Manufacturer	Amana Tool
Diameter	1/2 in
Cut Height, Length, or Width	3/4 in
Flute Geometry	Downcut

SPECIFICATIONS

Flute	2
Overall Length	2 3/8 in
Shank	1/4 in
