Thank you for shopping with us!

Amana Tool Solid Carbide Medium Burr with 135° Drill Point Fiberglass and Composite Cutting 1/4 x 3/4 x 1/4 Shank Router Bit incorporates reciprocating diamond-fluted geometry, strong negative rake angles, and generous fluting to provide the best cutting action in a wide variety of woven resin bond fiberglass and composite materials. Combining the proven performance of a diamond-cut geometry with the capacity to plunge, while leaving a minimum of top-side burr.

135° drillpoint minimizes part deflection on thin or otherwise unsupported workpieces.
