Thank you for shopping with us!

Amana Tool CNC Solid Carbide ZrN Coated Honeycomb Cutting Hogger 1/2 x 3 x 1/2 Shank, 8-Flute designed to cut a large variety of honeycomb materials, hogger geometry is excellent for shredding and chip evacuation while maintaining a smooth surface. Amana Tool's "hogger" style routers for honeycomb composites incorporate a precision-ground "knuckle" profile, allowing a freer-cutting action that reduces power requirements and less sidewall pressure in low output spindles while giving impressive gains in feed-rates. ZrN coating greatly enhances durability in highly abrasive composites.

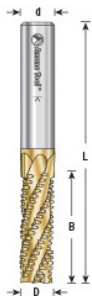

**Excellent for cutting:** Honeycomb, Composite Materials, Acrylonitrile-Butadiene-Styrene (ABS), Lexan™

**Warning:** Maximum RPM = 25,000

**Benefits of ZrN Coating:**

- Creates a harder and tougher cutting edge, allows for a prolonged cutting edge life, and helps to prevent the build-up of material in the flutes while cutting
- High resistance to wear
- Extended tool life
- Less friction & heat buildup

**Please note:** For optimal results and to extend tool life, please use mist lubricant system or air cooling. Please inspect cut and adjust accordingly.
