### **Item #46700-K, Amana Tool CNC Solid Carbide Spektra™ Extreme Tool Life Coated Compression Spiral 1/4 Dia x 7/8 x 1/4 Inch Shank for Baltic Birch Plywood**

**\$61.50**

Thank you for shopping with us! . Special unique carbide for longer lifetime in abrasive material. Designed for CNC applications requiring high feed rates and a clean finish. Designed for baltic birch plywood material. Long cherished for cabinet-making and more. Flawless compression cuts. Our Spektra™ bits feature a nACo® nanocomposite coating with an extreme nanohardness and heat resistance. With a brilliant distinctively-tinted coloring nACo provides additional improvements in four critical aspects of router tooling. -nACo coating is a micro-thin ceramic coating which enables the tool's cutting edge to retain crucial sharpness and lubricity. This provides longevity and produces cutting results of the highest quality. -Coating prevents high heat and oxidation which is detrimental to cutting tool performance. -Multi-colored hues, while attractive, will dissipate upon use and yet coating will remain fully effective. -nACo offers approximately 4,500 Vickers for impressive solid hardness on cutting areas of the tool, for an increase up to 2.5 times compared to uncoated bits. Note: Blue based color dissipates immediately upon use. nACo® nanocomposite coating will not wear off. **Excellent for cutting:** Baltic Birch Plywood

#### SPECIFICATIONS

<b>Manufacturer</b>	Amana Tool
<b>Diameter</b>	1/4 in
<b>B1</b>	7mm
<b>Cut Height, Length, or Width</b>	7/8 in
<b>Flute</b>	2
<b>Overall Length</b>	2 1/2 in
<b>Shank</b>	1/4 in
<b>Type</b>	nACo Ceramic Coating
