Item #54116, Amana Tool Carbide-Tipped Traditional Raised Panel 25 Deg 9/16" Angle x 1-5/8" Dia x 1/2" x 1/2" Shank \$65.21

Thank you for shopping with us!

Amana Tool Carbide-Tipped Traditional Raised Panel 25 Deg 9/16"
Angle x 1-5/8" Dia x 1/2" x 1/2" Shank

Create raised panels for cabinet doors, frame and panel furniture, and architectural paneling with a raised panel bit. The cutter forms a fillet to delineate the raised field, a shaped band around the field, and an integral tongue to fit the panel groove in the frame members. The profile contour and the reveal width varies. All tools have 1/2" shanks. Must be used in a table-mounted 3+ horsepower router and run at reduced speed. Use these bits for panels with curved edges. Multiple passes recommended.

Replacement bearing #47706

*Reveal 'A' reflects the total length of cut. Therefore, you must deduct 3/8" (usually) to allow the panel to recess into the frame.

SPECIFICATIONS

Manufacturer	Amana Tool
Diameter	1 5/8 in
Bearing(s)	47706, Amana Tool 3/16 ID x 1/2 OD x .195 Thick Steel Ball Bearing Guide
Cut Height, Length, or Width	1/2 in
Flute	2 w/Bearing
Note	Reveal 'A' reflects the total length of cut. Therefore, you must deduct 3/8 in (usually) to allow the panel to recess into the frame.

SPECIFICATIONS

Overall Length 2 3/8 in
