Amana Tool Carbide-Tipped Ogee Raised Panel 3/4 Radius x 1 1/16 Angle x 2-5/8 Dia x 5/8 x 1/2 Inch Shank

Create raised panels for cabinet doors, frame and panel furniture, and architectural paneling with a raised panel bit. The cutter forms a fillet to delineate the raised field, a shaped band around the field, and an integral tongue to fit the panel groove in the frame members. The profile contour and the reveal width varies. All tools have 1/2" shanks. Must be used in a table-mounted 3+ horsepower router and run at reduced speed. Use these bits for panels with curved edges. Multiple passes recommended.

Replacement bearing #47706

Warning: Maximum RPM = 20,000

*Reveal 'A' reflects the total length of cut. Therefore, you must deduct 3/8" (usually) to allow the panel to recess into the frame.

SPECIFICATIONS	
Manufacturer	Amana Tool
Diameter	2 5/8 in
Bearing(s)	47706, Amana Tool 3/16 ID x 1/2 OD x .195 Thick Steel Ball Bearing Guide
Cut Height, Length, or Width	5/8 in
Flute	2 w/Bearing
Note	Reveal A reflects the total length of cut. Therefore, you must deduct 3/8 in (usually) to allow the panel to recess into the frame.

SPECIFICATIONS

Overall Length	2 1/2 in
Radius	3/4 in
R1/Radius	--
Reveal	1 7/16 in
R2/Radius	--
Shank	1/2 in
Type	Ogee
Angle	--
RPM	Max 14,000
