Amana Tool Carbide-Tipped Ogee Raised Panel 7/8 Radius x 1 7/16 Angle x 3 3/8 Dia x 9/16 x 1/2 Inch Shank

Create raised panels for cabinet doors, frame and panel furniture, and architectural paneling with a raised panel bit. The cutter forms a fillet to delineate the raised field, a shaped band around the field, and an integral tongue to fit the panel groove in the frame members. The profile contour and the reveal width varies. All tools have 1/2" shanks. Must be used in a table-mounted 3+ horsepower router and run at reduced speed. Use these bits for panels with curved edges. Multiple passes recommended.

Replacement bearing #47706

**Warning:** Maximum RPM = 14,000

\*Reveal 'A' reflects the total length of cut. Therefore, you must deduct 3/8" (usually) to allow the panel to recess into the frame.
