Thank you for shopping with us! -No resharpening - Interlocking - hex design - Economical alternative to brazed bits

**Cut straight and flush with each and every cut without ever resharpening your bits.** E-Z Change™ router bits are an economical alternative to standard router bits. They feature replaceable head carbide-tipped cutters, saving you money by replacing only the cutters instead of the entire tool when the knives become dull. You won't need a second bit while yours is in the sharpening shop; instead, just change the cutters. You won't even lose your set-up because the E-Z Change™ cutters can be replaced with the bit in the router collet. The interlocking hex design guarantees that the cutting surfaces will not slip during use.

## SPECIFICATIONS
