Item #57118, Amana Tool Carbide-Tipped Countertop No-Drip with Ultra-Glide Radius Bearing Guide Solid Surface 1 Inch Dia x 7/8 x 5/16 Angle x 1/2 Shank **\$70.91**

Thank you for shopping with us! This bit will cut a "no drip" edge on kitchen and vanity countertops in one pass. Use in a handheld router.

Using the same quality standards as our regular steel bearings, Ultra-Glide™ bearing assemblies feature satin-smooth Delrin® sleeves. Delrin® is an industrial synthetic plastic material similar to nylon, and will leave no marks on the material being cut. Applications include solid-surface materials such as Gibraltar® Corian®, Surell® & Fountainhead®, Plexiglas® & other clear acrylics, and plastic laminates. Not recommended for regular wood applications due to a higher wear factor.
