- Titanium nitride M42 cobalt steel spot weld drills are designed for use in high strength high alloy steel commonly used in the automobile industry
- Titanium nitride coating doubles tool life, gives additional lubricity, and protects the cutting edges of the drill in tough removal applications
- Titanium nitride drills require a slower speed (490 RPM) than standard drills (1800 RPM) when drilling difficult materials

SPECIFICATIONS

Manufacturer	Viking Drill & Tool
Diameter	8 mm
Flats	Flat Length: None
Overall Length	2 1/4 in
RPM	When drilling difficult materials, Titanium Nitride drills require a slower speed (490 RPM) than standard drills
Size	5/16 in Approx Spotweld Size
Style	TiN Coated, Cobalt High-Speed Steel
