Material

Finish-Top:

Excellent

Material

Finish-Bottom:

Poor

Crescent

Points are good for both plunging and flat bottom cutting.

1 Flute

routers are a good choice for soft materials. They provide a good finish, and are capable of faster feed rates.

Downcut

routers produce the best finish to the top of the material. Chips flow in a downward direction.

Spiral routers should only be used in automatic feed operations. They are good for use on all materials.
