### Item #8031437, Whiteside Machine 1 7/16" 3-Wing Composite Drill 3 7/8" OAL Carbide-Tipped Quick Change Shank **\$142.92**

Thank you for shopping with us!

These 3-wing carbide-tipped drills are designed for extended life in fiberglass and other composites. The 7/16" hex shank provides a no-slip grip when used with a standard three jaw chuck. This shank design also makes switching to a different size so simple when used with our Quick Change Chucks. Accurate centering is ensured by the replaceable 1/8" high speed steel center point. Bits perform equally well in handheld electric or pneumatic drills as well as boring machines and drill presses. Can be resharpened or re-tipped.
