Item #AMS-115-K, Amana Tool AMS-115-K 2-Pc Solid Carbide Spektra™ Extreme Tool Life Coated Signmaking CNC Router Bit Pack, 1/4 Inch Shank **\$72.23**

Thank you for shopping with us! For the most demanding signmaking tasks. Designed for creating signs and other CNC projects in a variety of materials. Each router bit is manufactured from Amana's exclusive grade carbide according to stringent quality standards. Excellent for cutting: -Laminate - Melamine -Melamine Particle Board -MDF -Veneered Plywood -Wood Our Spektra™ bits feature a nACo® nanocomposite coating with an extreme nanohardness and heat resistance. With a brilliant distinctively-tinted coloring, nACo provides additional improvements in four critical aspects of router tooling: -nACo coating is a micro-thin ceramic coating, which enables the tool's cutting edge to retain crucial sharpness and lubricity. This provides longevity and produces cutting results of the highest quality. -Coating prevents high heat and oxidation that is detrimental to cutting tool performance. -Multi-colored hues, while attractive, will dissipate upon use and yet coating will remain fully effective. -nACo offers approximately 4,500 Vickers for impressive solid hardness on cutting areas of the tool, for an increase up to 2.5 times compared to uncoated bits. Note: Blue based color dissipates immediately upon use. nACo® nanocomposite coating will not wear off.

SPECIFICATIONS

Manufacturer Amana Tool

Includes 2-Pc - 46202-K & 45771-K CNC Spektra Signmaking Router Bit Pack
