Item #AMS-197-K, Amana Tool AMS-197-K 2-Pc Solid Carbide Spektra™ Extreme Tool Life Coated Signmaking CNC Router Bit Pack, 1/4 Inch Shank \$116.49

Thank you for shopping with us! For the most demanding signmaking tasks. Designed for creating signs and other CNC projects in a variety of materials. Each router bit is manufactured from Amana's exclusive grade carbide according to stringent quality standards. Our Spektra™ bits feature a nACo® nanocomposite coating with extreme nanohardness and heat resistance. With a brilliant distinctively-tinted coloring, nACo provides additional improvements in 4 critical aspects of router tooling: -nACo coating is a micro-thin ceramic coating, which enables the tool's cutting edge to retain crucial sharpness and lubricity. This provides longevity and produces cutting results of the highest quality. -Coating prevents high heat and oxidation that is detrimental to cutting tool performance. -Multi-colored hues, while attractive, will dissipate upon use and yet coating will remain fully effective. -nACo offers approximately 4,500 Vickers for impressive solid hardness on cutting areas of the tool, for an increase up to 2.5 times compared to uncoated bits. Note: Blue based color dissipates immediately upon use. nACo® nanocomposite coating will not wear off. Excellent for cutting: -Laminate -Melamine -Melamine Particle Board -MDF -Veneered Plywood -Wood

SPECIFICATIONS

Manufacturer	Amana Tool
Includes	2-Pc - 46202-K & 46170-K CNC Spektra Signmaking Router Bit Pack
Part Descp.	CNC Solid Carbide Spektra Extreme Tool Life Coated Compression Spiral & Solid Carbide Spektra Extreme Tool Life Coated Spiral Plunge
