Item #AMS-555, Amana Tool 8-Piece Carbide-Tipped 1/2" Shank Corner Round Collection \$335.87

Thank you for shopping with us! A basic edge-forming bit, the corner-rounding bit rounds an edge to a given radius. The tool is shouldered to cut a fillet. The cut can be used to ease edges, as a simple profile, or as part of a complex one. If a smaller pilot bearing is used, a second shoulder can be produced, in effect making the bit a beading bit. Stored in a solid wood showcase storage box with a Plexiglas® clear lid. Includes full color booklet.

Designed for the following materials:

Wood
