**Item #BURS-158NF, Amana Tool Ball Shape  
1/2" D x 7/16" CH x 1/4" Shank Non-Ferrous  
ZrN Coated SD Burr Bit for Die-Grinders  
\$35.89**

Thank you for shopping with us!

**Non Ferrous (NF)** burrs are specially designed for cutting all non-ferrous and non-metallic workpieces such as aluminum, zinc, plastic, wood, etc. The uniquely aggressive cutting action provides little to no chance of plugging the flutes.

**Applications:** To be used with air or electricity-driven hand die-grinder with a typical collet mechanism or knee mill with an air-driven spindle speeder such as an Air Turbine product. An air speeder can bump spindle.

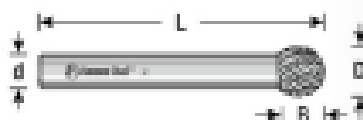

(Carbide brazed to steel shank.)

Warning: Not to be used in conventional routers.

Excellent for cutting:

- Aluminum
- Brass
- Bronze
- Copper
- Zinc
- Plastic
- Wood

\*Benefits of Zirconium Nitride (ZrN) Coating: Creates a harder and tougher cutting edge; allows for a prolonged cutting edge life and helps to prevent the buildup of material in the flutes while cutting. Has the tendency to run/spin much faster than an uncoated tool.

## SPECIFICATIONS

## SPECIFICATIONS

<b>Manufacturer</b>	Amana Tool
<b>Diameter</b>	1/2 in
<b>Cut Height, Length, or Width</b>	7/16 in
<b>Note</b>	Warning: Not to be used in conventional routers.
