Item #BURS-212, Amana Tool Solid Carbide Radius Cone Shape 1/4" D x 5/8" CH x 1/4" Shank Double Cut SL Burr Bit for Die-Grinders

\$16.17

Thank you for shopping with us!

Double Cut (DC) burrs utilize a cross flute of exactly half the number of standard flutes in an opposing helix. Benefits include rapid removal of a broad range of materials combined with excellent operator control. It does this by incorporating a cutting rake angle that gives great "bite" into the material, and yet is not so aggressive that the operator fatigues quickly after using it in a hand piece. A DC flute geometry gives better performance in low RPM applications, but still performs well at high RPMs.

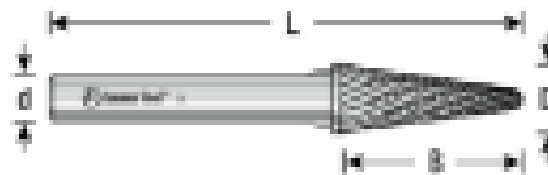

Applications: To be used with air or electricity-driven hand die-grinder with a typical collet mechanism or knee mill with an air-driven spindle speeder such as an Air Turbine product. An air speeder can bump spindle.

(Carbide brazed to steel shank.)

Warning: Not to be used in conventional routers.

Excellent for cutting:

- Aluminum
- Brass
- Bronze
- Copper
- Cast Iron
- Steel: 40-55rc
- Steel: 55-60rc
- Steel: Carbon
- Steel: Nickel
- Chrome
- Stainless Steel
- Steel Weldments
- Titanium

SPECIFICATIONS

Cut Height, Length, or Width	5/8 in
Manufacturer	Amana Tool
Diameter	1/4 in
Note	Warning: Not to be used in conventional routers.
Overall Length	2 in
Shank	1/4 in
Style	DC Ref #SL-1DC
Type	Double Cut/Solid Carbide
