Item #CTC12903-5/8, Amana Tool Carbide-Tipped Miter California TC Grind 12 Inch Dia x 90T C-TCG, -5 Deg, 5/8 Bore **\$231.41**

Thank you for shopping with us! Blades are true "Imperial" sizes. The California triple chip grind is the choice in the door and window manufacturing industry, and in framing shops everywhere. Its cuts are crisp and clean in wood, ACM (Aluminum Composite Materials) such as Alucobond®, Dibond®, Durabond®, etc., and burr-free in aluminum and other non-ferrous metals. This blade has a very high tooth count, a 5° negative hook, and a stout plate for smooth cuts and a long tool life. It works in miter saws, compound miter saws, and sliding compound saws. **Warning: NEVER attempt to cut ferrous metals (steel, iron, etc.) with these saw blades. When cutting non-ferrous metals, a coolant or blade wax should be used and proper clamping devices employed.**

SPECIFICATIONS

Manufacturer	Amana Tool
Diameter	12 in
Bore	5/8 in
Grind	C-TCG
Kerf	0.135 in
Machine	Pistorius, CTD
Plate	.110 in
Teeth	90
