Thank you for shopping with us!

DRB-420: Polycrystalline Diamond (PCD) for extremely long life.

Diamond is the hardest naturally-occurring material on the earth. Polycrystalline Diamond (PCD) tooling is manufactured in a high-temperature and high-pressure laboratory that fuses diamond particles onto a carbide substrate, which allows the diamond to be brazed onto a tool body.

If you're looking for the ultimate in tooling, you've found it. Our diamond router bits will cut a wide variety of tough, abrasive materials. The cutting edge lasts up to 100 times longer than carbide; in the long-run, PCD is the most economical choice. Diamond tipped compression with carbide plunge point router bits for grooving, jointing & rabbeting in composites, MDF, laminate, plastic, wood, veneers and more. Up/Down-shear for double-sided material.
