### Item #DRB 504, Amana Tool CNC Polycrystalline Diamond (PCD) Corner Round for Composites 1/4" Radius x 1" Dia x 1/4" Shank (Industrial)

Thank you for shopping with us!

Diamond is the hardest naturally-occurring material on the earth. Polycrystalline Diamond (PCD) tooling is manufactured in a high-temperature and high-pressure laboratory that fuses diamond particles onto a carbide substrate, which allows the diamond to be brazed onto a tool body.

If you're looking for the ultimate in tooling, you've found it. Amana Tool's diamond router bits will cut a wide variety of tough, abrasive materials. The cutting edge lasts up to 100 times longer than carbide; in the long-run, PCD is the most economical choice.

#### **Excellent for Corner Rounding:**

- Fiberglass Reinforced Composites
- Lightweight composites
- Custom composite materials
- Fiber-reinforced urethane
- Fiber-reinforced structural foam floors
- MDF
- Chipboard
- Wood
- Laminates

#### **Benefits of Diamond Technology**

- Improved cycle times by enabling high material removal rates
- Faster speeds and feeds compared to conventional cutting tools
- Improved workpiece quality with tight dimensional control
- Optimized machine tool efficiency by increasing production capacity
- Consistently good component surface finish
- Can be reground up to 5 to 7 times
- Wear rate is much less than the carbide-tipped tools

## SPECIFICATIONS

<b>Manufacturer</b>	Amana Tool
<b>Diameter</b>	1 in
<b>Cut Height, Length, or Width</b>	1/2 in
<b>Flute</b>	2

## SPECIFICATIONS

<b>Includes</b>	Ball Bearing Guide
<b>Overall Length</b>	2 1/16 in
<b>Radius</b>	1/4 in
<b>Shank</b>	1/4 in
