### Item #GM-25540-2, Tenryu Gold Medal Series Saw Blades \$117.00

Thank you for shopping with us!

Due to customer demand, Tenryu added a full-kerf (.125" ) version of the award-winning Gold Medal (GM-25540-2). This premium combination blade is ideal for use on SawStop or other riving knife-equipped table saws.

This is the top of the line choice for the serious craftsman who wants one superior table saw blade for most all woodworking.

Saw plate run-out less than .002" for flat true run. Built-in dampening system reduces vibration, making cuts quieter and more precise. Performs smooth, easy crosscuts and rips. Even does a great job on double-sided laminates.

Carbide tip material is an extra hard C-4 and super-fine grain with corrosion inhibitors to give the keenest edge and longest sharp life.

#### Each Blade Features:

- Fully hardened, expertly tensioned tool steel body for true and accurate cuts; meticulously hand-hammer tensioned.
- A new grade of extra-hard carbide resists both abrasive and chemical wear better than standard grades for longer life.
- Resin bond-filled expansion slots to absorb any vibration and reduce cutting noise.
- Tenryu's fine grit honing ensures a mirror finish on carbide for the keenest possible edges and a super clean cut.
