Thank you for shopping with us!

Tenryu introduces a unique grind of non-ferrous cutting blades for very thin stock, such as picture frame moulding, radiator fins, or other thin-walled aluminum extruded materials.

The regular Industrial Series for Non-Ferrous blade has the anti-noise and anti-vibration design. However, this specialty thin stock non-ferrous cutting blade series performs even quieter and with less vibration. There is almost no deformation of the material after cutting and much less high pitch noise during the cut.

### SPECIFICATIONS

<b>Manufacturer</b>	Tenryu
<b>Application</b>	For chop/miter/radial arm saw
<b>Arbor</b>	30mm
<b>Diameter</b>	300 mm

## SPECIFICATIONS

<b>Grind</b>	MTCG
<b>Kerf</b>	0.11
<b>Rake</b>	-5
<b>RPM</b>	5,100
<b>Teeth</b>	108
