### **Item #LU5A17, Freud® 400mm Dia, 32mm Arbor, 10 deg Hook angle, 96 Teeth Saw Blade to Cut Non-Ferrous Metals: Series LU5A** **\$197.10**

Thank you for shopping with us!

Carbide-Tipped blade ideal for cutting aluminum and non-ferrous metals. Incorporates Tri-Metal Brazing, which consists of copper sandwiched between two layers of silver alloy to create a stronger, more impact-resistant bond between the carbide and the blade body.

Silver I.C.E. Coating prevents build-up on the blade surface and keeps the blade running cooler and cleaner.

Machines: Single or double miter saws with mechanical clamping of the piece.

Features: Flat triple-chip tooth with positive cutting angle.

Material: Aluminum and non-ferrous metals.

Ideal For: To cut solid drawn products with a thickness included between 2mm and 10 mm.
