CUTS **Item #LU73M016, Freud Cabinetmaker's Crosscut Blades: LU73M**
\$174.49

Thank you for shopping with us!

Features TiCo™ Hi-Density Carbide Crosscutting Blend for maximum performance. Precision tensioning with computer-controlled equipment keeps the blade flat and true while maximizing blade life and performance.

Freud's new Cabinetmaker's crosscut blade includes a 38 degree Hi-ATB (Alternate Top Bevel) tooth grind that delivers excellent crosscuts in double-sided veneer plywood and double-sided melamine. Silver Ice Coating resists corrosion and pitch build-up. Designed primarily for heavy use in a cabinetmaker's shop. The LU73 series is ideal for cutting in hardwood, softwood, plywood, and chipboard in thicknesses from 1/2" to 2 3/4" .

Tip: When cutting on a table saw, put the finish side of your workpiece facing up. When cutting with a radial arm saw or handheld saw, put the finish side down. This reduces splintering.

SPECIFICATIONS

Manufacturer	Freud Tools
Diameter	16 in
Arbor	1 in
Kerf	.150 in
Plate	.110 in
Teeth	96 ATB
Type	Silver Ice
