Item #LU77M010, Freud Thin Kerf Non-Ferrous Metal Blades: LU77M Series **\$93.73**

Thank you for shopping with us!

Application: Cuts Non-Ferrous Materials & Aluminum

This thin kerf heavy-duty, non-ferrous metal cutting blade produces an excellent finish. These blades have custom designed gullets to minimize chip buildup and specially formulated carbide for long life. Freud recommends use of a liquid lubricant when cutting. This can be accomplished with a spray of WD-40 or other lubricant every 4 to 5 cuts. *Wax sticks are not recommended.*

Premium TiCo™ HI-Density Carbide Non-Ferrous Blend for Maximum Performance. Freud-Made TiCo™ Carbide specifically designed to cut non-ferrous metals extends tooth life. Thin Kerf allows for faster feed rate and reduced waste. Silver Ice™ Coating resists corrosion and pitch buildup.

Ideal For: Cutting Thick Non-Ferrous Materials & Aluminum. Wall thickness 1/4" Max.

Tip: To determine if the metal you wish to cut is non-ferrous, hold the metal next to a magnet. If it attracts the magnet, it is a ferrous metal and should not be cut with a non-ferrous blade.

SPECIFICATIONS

Diameter	10 in
Arbor	5/8 in
Kerf	.091 in
Plate	.071 in
Teeth	80 TCG
Type	Silver Ice
Manufacturer	Freud Tools
